Contents Volume 21, 1993

Special Issue: Coastal morphodynamics: processes and modelling

Editor: H.J. de Vriend

Introduction 3
Wave transformation in the nearshore zone
L. Hamm, P.A. Madsen and D. H. Peregrine 5
Wave–current interaction within and outside the bottom boundary layer
R.L. Soulsby, L. Hamm, G. Klopman, D. Myrhaug, R.R. Simons and G.P. Thomas 41
Modelling of non-cohesive sediment transport processes in the marine environment
J. Fredsøe 71
The characterisation of cohesive sediment properties
J. Berlamont, M. Ockenden, E. Toorman and J. Winterwerp 105
Cohesive sediment transport processes
C. Teisson, M. Ockenden, P. Le Hir, C. Kranenburg and L. Hamm 129
Cross-shore profile models
J.A. Roelvink and I. Brøker 163
Medium-term 2DH coastal area modelling
H.J. De Vriend, J. Zyserman, J. Nicholson, J.A. Roelvink, P. Péchon and H.N. Southgate 193
Approaches to long-term modelling of coastal morphology: a review
H.J. De Vriend, M. Capobianco, T. Chesher, H.E. De Swart, B. Latteux and M.J.F. Stive 225

Research papers
Wave grouping and sequential correlation, field studies in Italian coastal areas
A. Lamberti and V. Rossi 271
Statistical and hydrodynamic models for the operational forecasting of floods in the Venice Lagoon
J. Vieira, J. Føns and G. Cecconi 301
Effects of bathymetric complexities and wind generation in a coastal wave propagation model
C. Bondzie and V.G. Panchang 333
